

6-TH NEWSLETTER OF 4GreenInn project

All good things have also their end and alas, the situation with our exciting project is not different. But meanwhile we had some interesting events in which the partnership defined the framework of a possible future cooperation so we hope the end puts the bases of a new beginning.

Elaboration of the demo models in all partner countries

The Demo models include technical designs of Nature Centres for a definite protected area in each one of the partner regions. The idea is protected natural areas to be integrated in the overall strategies for urban and socio economic development making them accessible for visitors and thematic tourism.

The designed visitors centre at lake Vaya – Burgas, conforms to the requirements for a building with energy consumption close to zero. The demo model includes a thematic route with interpretative spots and information tables for the biodiversity of Vaya Lake. The centre will offer a viewing platform for bird watching and observation of the area.

The demo model of SERDA – Romania is developed as an innovative model for management for the Small Island of Braila and the visitors centre will be situated in an accessible location in Braila. The mission of the Visitor Centre is to promote the area’s touristic potential with focus on Braila Small Island Natural Park having the aim to increase the visibility of the local/regional touristic attraction as well as the number of tourists in the area. Therefore, the Center will contribute to the promotion of local and regional tourism and raising awareness increase of tourists and tourism operators for preserving the natural protected areas.

region. The visitors centre will be a place which re-creates the history, biodiversity and the geographical characteristics of Machakhela Protected Area.

Final event – Conference under 4GreenInn Project in Burgas, Bulgaria

On 3.June 2016 in permanent exhibition centre FLORA – Burgas there was held the final conference under our project. It was attended by stakeholders from the region of Black Sea Basin and by representatives of the project partners.

The final event was followed by local final press conferences in the partner countries Romania and Georgia. In Romania the final press conference was preceded by the Info-Day event and a site visit in Braila Small Island Natural Park.

ASSOCIATED PARTNERS CORNER

FINAL EVENT

Burgas associated partner Bulgarian Biodiversity Foundation participated in the final event under the project with an attractive presentation about the biodiversity in the lakes around Burgas and Innovative strategies and ideas for management of the protected areas.
